
a.
Young (2–4 mo) vs Geriatric (27–32 mo)
Angiogenesis (H)
Complement (H)
Bile acid metabolism (H)
MTORC1 signaling (H)
Interferon gamma response (H)
IL2 STAT5 signaling (H)
Inflammatory response (H)
Interferon alpha response (H)
Androgen response (H)
Glycolysis (H)
Estrogen response late (H)
Estrogen response early (H)
Epithelial mesenchymal transition (H)
Heme metabolism (H)
Uv response dn (H)
2.5 2 1.5 1 1.5 2 2.5
Fold enrichment of age-specific contacts
Young-specific
Old-specific
FDR < 0.05
b.
Young (2–4 mo) vs Old (20–24 mo)
Interferon gamma response (H)
Interferon alpha response (H)
Complement (H)
KRAS signaling up (H)
Bile acid metabolism (H)
Estrogen response late (H)
Inflammatory response (H)
G2M checkpoint (H)
Uv response dn (H)
Estrogen response early (H)
Heme metabolism (H)
IL6 JAK STAT3 signaling (H)
1.5 1 1.5
Fold enrichment of age-specific contacts
Young-specific
Old-specific
FDR < 0.05
c.
Young (2–4 mo) vs Geriatric (27–32 mo)
Inflammatory response (H)
Angiogenesis (H)
Complement (H)
Bile acid metabolism (H)
IL2 STAT5 signaling (H)
Interferon alpha response (H)
4 3 2 1 0 1 2 3 4
−log10 nominal p (locus-matched permutation)
Old-specific, p < 0.05
Old-specific, p ≤ 0.1
Young-specific, p < 0.05
Young-specific, p ≤ 0.1
d.
Young (2–4 mo) vs Old (20–24 mo)
Interferon alpha response (H)
Interferon gamma response (H)
KRAS signaling up (H)
Angiogenesis (H)
IL6 JAK STAT3 signaling (H)
Estrogen response early (H)
Reactive oxygen species pathway (H)
G2M checkpoint (H)
Inflammatory response (H)
2 1 0 1 2
−log10 nominal p (locus-matched permutation)
Old-specific, p < 0.05
Old-specific, p ≤ 0.1
Young-specific, p < 0.05
Young-specific, p ≤ 0.1
e.
Young (2–4 mo) vs Geriatric (27–32 mo)
IFN-γ
IFN-α
Colocalization log2(old fold / young fold)
Colocalization enrichment
Not significant
Young-specific (FDR < 0.05)
Both (FDR < 0.05)
Old-specific (FDR < 0.05)
Expression, old vs young (GSEA NES)
f.
Young (2–4 mo) vs Old (20–24 mo)
IFN-γ
IFN-α
Colocalization log2(old fold / young fold)
Colocalization enrichment
Not significant
Young-specific (FDR < 0.05)
Both (FDR < 0.05)
Old-specific (FDR < 0.05)
Expression, old vs young (GSEA NES)
