
a.
Young (2 mo) vs Geriatric (28–32 mo)
Inflammatory response (H)
Angiogenesis (H)
Interferon gamma response (H)
Interferon alpha response (H)
Fibrosis (O)
Apoptosis (H)
Reactive oxygen species pathway (H)
Coagulation (H)
Androgen response (H)
KRAS signaling up (H)
Bile acid metabolism (H)
3 2 1 0 1 2 3
−log10 nominal p
(locus-matched permutation)
Old-specific, p < 0.05
Old-specific, p ≤ 0.1
Young-specific, p < 0.05
Young-specific, p ≤ 0.1
b.
Aged (23–24 mo) vs Geriatric (28–32 mo)
Interferon alpha response (H)
Estrogen response early (H)
Interferon gamma response (H)
Estrogen response late (H)
IL6 JAK STAT3 signaling (H)
Heme metabolism (H)
Reactive oxygen species pathway (H)
Inflammatory response (H)
Bile acid metabolism (H)
3 2 1 0 1 2 3
−log10 nominal p
(locus-matched permutation)
Geriatric-specific, p < 0.05
Geriatric-specific, p ≤ 0.1
Aged-specific, p < 0.05
Aged-specific, p ≤ 0.1
